Mykonos

Located in the center of the Cyclades group of islands, Mykonos is one of the most famous Greek islands for its cosmopolitan atmosphere and lively nightlife! A vacation in Mykonos is an experience of a lifetime and there are many incredible things to do in Mykonos. Be enchanted by the extraordinary sunset from Little Venice Mykonos, stroll through the cobbled streets of Chora, enjoy your stay in Mykonos' luxurious hotels and swim in Mykonos' exotic beaches. When the sun sets, join the island's nightlife scene and party in Mykonos' legendary clubs! According to Greek mythology, the island is named after Mykonos, grandson of Apollo. According to Greek mythology, Mykonos was formed when Hercules defeated the Giants. The petrified bodies of the Giants became the rocks that formed the island of Mykonos. Mykonos is called "The island of winds". Mykonos is located in the Cyclades, an archipelago that also includes Naxos, Santorini, Delos, Ios and Milos, just to name a few (there are over 200 islands in the Cyclades, but many of them are tiny and uninhabited).

Mykonos can be reached from several Italian airports. From Milan easyJet usually leaves at 6.30 am and arrives in Mykonos, after 2 hours of flight. The transfer to the hotel will be by car or minibus.

Mykonos is an island of the Aegean Sea located in the Cyclades archipelago. On a hill near the city of Mykonos is one of the main monuments of the island: a series of windmills that were built in the 16th century.

The staff will be at your disposal to recommend restaurants according to your preferences; romantic on the sea, typical in the Chora or with breathtaking views of the city. Or they will show you where to stop in one of the many typical restaurants or taverns.

EXPLORE THE CITY OF MYKONOS

The city of Mykonos is the fantastic country of whitewashed buildings, narrow streets, colorful doors, luxury stores and small churches with blue and red domes. Exploring this maze of catwalks is one of the best things to do in Mykonos. The city of Mykonos is also called Chora, which in Greek means city. On Greek islands, it is common practice for the main city to share the name with the island. The city of Mykonos is small and it does not take long to walk from one end to the other. However, this is literally a maze of narrow streets that all look the same. I read that this was done on purpose in order to confuse the pirates who would come to Mykonos and raid the city. The maze of streets and dead ends were a way in which the city could protect itself from these invaders. Matogianni Street, located near the center of Mykonos city, is one of the picturesque parts of the city. Delia is a small island of the Cyclades and is one of the most important archaeological and mythical sites in Greece. The island is a UNESCO World Heritage Site and stone huts dating back 5,000 years have been found here. The island is literally full of ancient archaeological sites.

T R A V E L E V E N T

Friday, May 20th

First day

Arrival in the morning and free lunch.
